

COUNSELING SERVICES:

Resolve Counseling Agency, employed by the District, provides health services, which include short-term programs designed to meet the needs of the elementary community. Resolve offers individual, group, and family counseling, with parental consent, which addresses the wide range of challenges facing children today. Concerns and difficulties in the area of self-esteem, peer relations, emotional wellbeing, social/personality development, family issues, and substance use, are among the issues addressed.

Parents wishing more information should contact the Resolve Office (at (908) 322-9180), the classroom teacher, or the principal. An instructional component has been added to our Resolve services where classroom lessons related to topics that are pertinent to the developmental needs of the students are being implemented.
