Annual Integrated Pest Management Notice
For School Year 2018 - 2019

Dear Parent, Guardian, or Staff Member:

This notice is being distributed to comply with the New Jersey School Integrated Pest Management Act. School District of Scotch Plains Fanwood Public Schools has adopted an Integrated Pest Management (IPM) Policy and has implemented an IPM Plan to comply with this law. IPM is a holistic, preventive approach to managing pests that is explained further in the schools IPM Policy included with this notice.

All schools in New Jersey are required to have an Integrated Pest Management Coordinator (IPM Coordinator) to oversee all activities related to IPM and pesticide use at the school.

The IPM Coordinator for Scotch Plains Fanwood Public Schools

Name of IPM Coordinator: Anthony Miranda

Business Phone number: 908-322-4132

Business Address: 580 Park Ave Scotch Plains N.J. 07076

The IPM Coordinator maintains the pesticide product label, and the Material Safety Data Sheet (MSDS) (when one is available), of each pesticide product that may be used on school property. The label and the MSDS are available for review by a parent, guardian, staff member, or student attending the school. Also, the IPM Coordinator is available to parents, guardians, and staff members for information and to discuss comments about IPM activities and pesticide use at the school.

As part of a school pest management plans Scotch Plains Fanwood Public Schools may use pesticides to control pests. The United States Environmental Protection Agency (EPA) and the New Jersey Department of Environmental Protection (DEP) register pesticides to determine that the use of a pesticide in accordance with instructions printed on the label does not pose an unreasonable risk to human health and the environment. Nevertheless, the EPA and the DEP cannot guarantee that registered pesticides do not pose any risk to human health, thus unnecessary exposure to pesticides should be avoided. The EPA has issued the statement that where possible, persons who are potentially sensitive, such as pregnant women, infants and children, should avoid unnecessary pesticide exposure.

The following items must be included with this annual notice:

- A copy of the school or school district’s IPM policy.

- The date, time and place of any meeting if one is to be held for the purpose of adopting or modifying the school integrated pest management policy or plan.

- A list of pesticides that are in use or that have been used in the past 12 months on school property.
SCHOOL INTEGRATED PEST MANAGEMENT

Approved: September 23, 2004

The New Jersey School Integrated Pest Management Act of 2002 requires schools to implement a school integrated pest management policy.

The law requires the superintendent of the school district, for each school in the district, to implement Integrated Pest Management (IPM) procedures to control pests and minimize exposure of children, faculty, and staff to pesticides. The Scotch Plains-Fanwood Public School District shall therefore develop and maintain an IPM plan as part of the school’s policy.

Integrated Pest Management Procedures in Schools

Implementation of IPM procedures will determine when to control pests and whether to use mechanical, physical, cultural, biological or chemical methods. Applying IPM principles prevents unacceptable levels of pest damage by the most economical means and with the least possible hazard to people, property, and the environment.

Each school shall consider the full range of management options, including no action at all. Non-pesticide pest management methods are to be used whenever possible. The choice of using a pesticide shall be based on a review of all other available options and a determination that these options are not effective or not reasonable. When it is determined that a pesticide must be used, low impact pesticides and methods are preferred and shall be considered for use first.

Development of IPM Plans

The school IPM plan is a blueprint of how the Scotch Plains-Fanwood Public School District will manage pests through IPM methods. The school IPM plan states the school’s goals regarding the management of pests and the use of pesticides. It reflects the school’s site-specific needs. The IPM plan shall provide a description of how each component of the school IPM policy will be implemented at each school. For public schools, the local school board, in collaboration with the school building principal, shall be responsible for the development of the IPM plan for his/her school.
Notification of the Use of Pesticides
(This notice should be received at least 72 hours prior to pesticide use)

Date: Tuesday August 8th 2017

To: Parents/guardians of students, and staff

From: The School IPM Coordinator: Mr. Anthony Miranda 
Phone Number: (908) - 322 - 4132

This notice is to advise you that the following pesticides will be used on all grass surfaces of EVERGREEN ELEMENTARY SCHOOL, PARK MIDDLE SCHOOL AND HIGH SCHOOL.

If an outdoor application, 3 dates must be listed, in chronological order, on which the outdoor application may take place if the preceding date is canceled.

**OUTDOOR APPLICATION FRIDAY AUGUST 11 2017**
RAIN DATES | AUGUST 12 2017 | AUGUST 13 2017

Description of the possible adverse effects of the pesticides as per the Material Safety Data Sheets for the pesticides to be used, if available:

Keep out of the reach of children. Hazard to humans and domestic animals. Harmful if swallowed, inhaled or absorbed through the skin.

Causes eye irritation. Do not get in eyes, on skin, or on clothing. Do not breathe spray mist.

Causes eye irritation. May cause redness, tearing, do not get into eyes.

Harmful if absorbed through the skin. Do not get on skin or clothing. May produce symptoms similar to those from ingestion. May cause irritation, redness, and swelling.

Harmful if ingested. May cause shortness of breath, drowsiness, involuntary shaking, muscle weakness, convulsions.

Harmful if inhaled. Avoid breathing spray mist. May produce symptoms similar to those from ingestion.

May cause shortness of breath excitement, involuntary shaking and irritability.

Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema or bronchitis.

Pesticide product label instructions and precautions related to Public Safety.

Emergency First Aid Procedures:

General advice:

- First aid personnel should pay attention to their own safety. If the patient is likely to become unconscious, place and transport in stable sideways position (recovery position). Immediately remove contaminated clothing.
- If inhaled: Keep patient calm, remove to fresh air, seek medical attention.
- If on skin: Immediately wash thoroughly with soap and water, seek medical attention.
- If in eyes: Wash affected eyes for at least 15 minutes under running water with eyelids held open.
- If swallowed: Immediately rinse mouth and then drink 200-300 ml of water, seek medical attention.

Note: as required by law, we are advising you of the following statement:

_The Office of Pesticide Programs of the United States Environmental Protection Agency has stated:_

“Where possible, persons who potentially are sensitive, such as pregnant women, infants, and children, should avoid any unnecessary pesticide exposure.”
